A PLAYGROUND EQUIPMENT  
COMPANY

# Playground Equipment Catalogue

**Made In India**  
#AtmaNirbharBharat

We do custom designs as per your requirements.

# WHO WE ARE

**We are a family of vibrant, enthusiastic, young blood always looking for new avenues heralding in an illimitable arena of abundant growth, scope & exciting results satisfying the needs of the customers as & when required. Customer service is an insatiable urge on our books. We are a team of young and dedicated professionals who understand customers' needs and necessities. It is a place where memories are created and time is cherished. We have served more than 1000 families for over 5 years. Come and experience an unmissable blend of fun frolic adventurous outlook towards life.**

On the simple platform structured in connection with the familial relations sourced & discovered during strenuous and laborious attempts and contacts poured through exercise of all our staff.

Quality outdoor play & open gym equipment is a peripheral production centralized at our end.

To workout volumes on sustainably concerned, each of us is committed with a passion to develop products that are durable, attractive, eco-friendly & customer oriented.

We want to create communities where people can discover pure pleasure and comfort and a family can enjoy and bind together.

As a result of unending efforts in the market we have been ultimately on the verge to opine that the rays spread on the sky since gathering place on a customer field seeking its radiant, cool & appealing advice on the horizon at the time of sunset.

# Flooring

We have 3 different types of flooring for play area.

## 1. EPDM

## 2. Rubber Tiles

## 3. Artificial Grass

# EPDM

## EPDM - Ethylene Propylene Diene Monomer

- EPDM Rubber Flooring – Safe play is premium flooring for kidsplay area indoor or out door offers a solution mix of Rubber buffing and EPDM rubber granules with PU Binder, that give vibrant colours and most important cushion for playgorund.
- The product offers a choice for client to mix and match the colour of the playground with the main theme desired designs. Based on EPDM technology, this flooring comes with fresh and permanent colours that do not fade away with either time or use.

## Features

- Safe fall height and meeting all standard safe fall height criterias. Can provide fall height safety upto 12 feet.
- Seamless, slip-resistant, porous. Slip resistant even under wet conditions.
- Materials are finest, high quality European make EPDM granules and 100% polyurethane binder.
- Highly professional installation.
- Custom inlaid graphic designs.
- Long-term performance with low maintenance.

## Applications

- Kids play area for safety.
- Jogging tracks and walkways for safety of knee and joints due to shock absorption characteristics.
- Swimming pool decks for safety and aesthetics due to its anti slip characteristics and safe fall
- Water parks for safety and aesthetic applications due to its anti slip and safe fall characteristics.
- Fitness trails and sports floors including basketball, handball, volleyball, badminton courts, gyms etc.
- Any other playground application where safety is of prime concern.

## Important Remarks

- Avoid water logged area and moisture surface before application of EPDM rubber flooring.
- Temperature ideal less than 30°C, while in the winter, the minimum bearing temperature during application and drying should be over 18°C.
- Freshly coated surface should be protected from high temperatures, wind, rain and frost for at least the first 24 hours.
- Easy to repair.

## Do's

Do cleaning of flooring with dry and soft broom daily or wet cloth wipe.

Do cover the surface always with plastic or tarpaulin sheets for any civil work going around the flooring premise to avoid any cement or building material damage to the surface.

Do a deep cleaning of flooring using water spray for dust removal within 7- 10 days of time as per need.

Do trimming of hanging tree branches periodically to avoid fall of dried wood, leaves, and birds droppings which cause stain and smell on surface.

Do take care of flooring while kids play equipment work is carried out where oiling- greasing or painting or any type of maintenance going on which can leave back stain on the surface but can be cleaned using wet cloth wipe.

## Don'ts

Don't allow to walk, run or play wearing hard sole footwear e.g.: Spikes, Heels, etc which can damage the surface with period of time.

Don't allow the garden mud to spill on the flooring area which can damage the color shades of surface

Don't allow the water collected in forming bird baths which can collect dust leaving dirt and decolorization of the surface behind.

Don't allow any eatables or beverage items in the flooring area, if dropped or spilled can leave dirt and smell from the surface.

Don't allow kids to play sports such as cricket, football, hockey, etc. can cause rough marks and material damage with sports equipment.

Don't use any type of chemical solvent, acids, bleaching agents, etc. for cleaning purposes which can react with the flooring material.

Don't allow pet animals like dogs, cats, or stray dogs to wander, activities like nail scratching or litter can damage the surface.

Don't allow the use of a hard metal brush to remove any type of dirt or dust which can remove the fine granule readily.

Don't allow any fabrication or carpentry work to be carried on flooring area, as metal tools or implements can cause severe damage and along with unreparable spots.

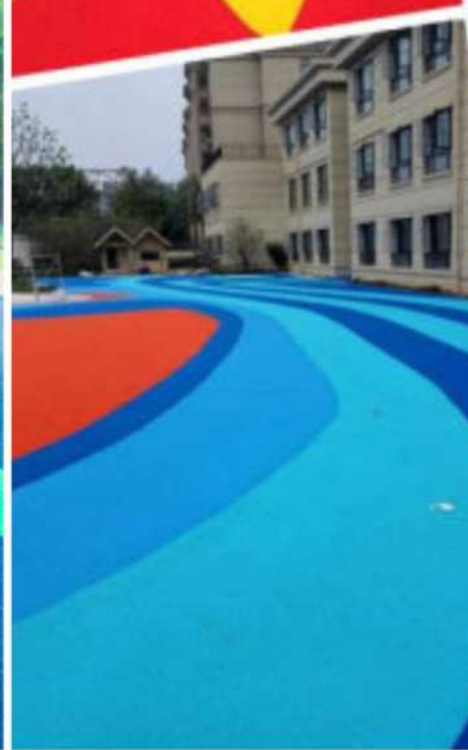

Don't allow the use of any heavy metal push-pull activity on flooring even metal wheelbase trolley should not be used.

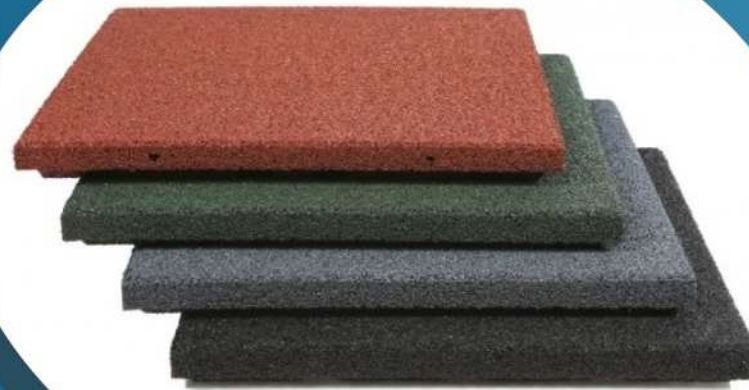

Don't allow the movement of metal legs chair which can damage the flooring leaving a scratch or Imprint marks.

# Rubber Tiles

- Rubber tile is a specialty flooring option designed to add padding and spring underfoot. Its unique qualities and style options make it a more versatile flooring option than you might initially think. From gyms to playrooms, rubber tile is a great choice for many spaces.
- Thickness: 10 mm | 12 mm | 15 mm | 20 mm | 25 mm

# Artificial Grass

- Artificial grass is a surface of synthetic fibers made to look like natural grass. It is most often used in arenas for sports that were originally or are normally played on grass. It is also used in playground area. However, it is now being used on residential lawns and commercial applications as well.
- Thickness: 10 mm | 15 mm | 20 mm | 25 mm | 35 mm

# Useful tips for a perfect play ground

A playground does not need expensive equipment or a large space to be successful. What makes it effective is that it becomes a safe place for all, promotes free play requiring minimal adult intervention and leads to creative play. Some useful tips to making a perfect playground are below

## Where

Locate the playground in a space that is easily accessible by children but away from vehicular traffic to avoid children running into it. Choose a place that receives good ventilation and sunlight, both of which are essential to children.

## Age Group

If space allows, group play equipment or areas into age appropriate zones to avoid larger kids monopolizing the playground.

## Safe Distance

Allow safe distance around each play equipment and do not crowd too many pieces of equipment into one area.

## Activities

Provide for one or two larger multi play equipment for large group play and a couple of smaller equipment for individual play. Allow for equipment that provide a range of activities – swinging, climbing, sliding, crawling, balancing.

## Colours

Use play equipment that have bright attractive colours, that do not heat up in the sun and have no sharp edges.

## Safe Surfaces

Play equipments need to be located in a bed of fine washed sand or a rubberized fall arrest safety surfaces can be in bright colours or having graphics on them which appeal to kids- e.g. a giant snake and ladder board. Sand by itself forms a play medium and a source of endless imaginative play for kids.

## Supervision

The playground should have high visibility for kid's safety and supervision. Avoid large shrubs or screening and instead use low ground covers and trees around the playgrounds. Provide seating close by for adults to sit, especially in playgrounds catering to smaller kids.

# Things to watch out while your kid is playing

Play is an essential part in development of a child to be it physical, emotional, social or intellectual. Whether the child is playing in a playground, on the X-box, ipad or inside the house with his or her toys, it tells us a great deal about them, if we only pay attention to it. So what are we looking at? And what should you generally look for?

## Where

Where does your child prefer to play? Does he or she like to be in the house with a selected bunch of toys, would he rather have just one best friend to play in the building is he friends with the world and run about with everyone and everywhere on the playground? Preferences gives us insights how comfortable the child is in different places.

## What

What does your child like to play? Is he the kind who loves only video games? Would she shun other kids and play with dolls in a corner or play teacher-teacher? Is it your child who is monkeying around, disregarding rules of games and generally having fun disrupting others games? Understanding this will help you comprehend a lot of intellectual skills from creativity to simple problem solving.

## How

How is the child playing... quietly or with lot of ruckus? Does he give instructions to others, follow instructions or get angry when others don't listen to him? Does he throw the blocks, bang the blocks on the ground or build a tower of the blocks? Can he/she use it imaginatively or does he need to be shown what it is to be down? When you start noting how your child is interacting just with the toys, in the playground it's a wonderful insight on how he utilizes his skills.

## Whom

Which age group is the child more comfortable with? Younger, adults or old people? If your child generally enjoys playing outside... which group of people is he/she interacting with? Keeping an eye on playmates is important to safeguard the child against any danger.

## Social

Observe how comfortable your child is in a group setting. Does he/she get teased, bullied or he/she the one doing the teasing and bullying. Early childhood impressions of the self do tend to leave impressions and need to be addressed.

## Stamina

Play improves the child's endurance and stamina. Lack of age appropriate play affects the child's overall development. Does your child feel tired quicker than other children of his age, does he show disinterest in physical activities or does he play all day long and yet would not fall asleep at night?

## Communication

How does your child talk to others in group? Is he argumentative, bossy, submissive, does he cry easily? Is he able to make his friends understand his opinions? Language is very important part which also develops in play and understanding communication patterns of the child in play will help parents and teachers improve upon communication skills.

# WARRANTY

**Buyer agrees that product created by FLOW TECH ENTERPRISE Carries the following warranty:**

- Limited 5 year warranty on structure/ pipe components.
- Limited 3 year warranty on metallic parts: deck, ladder, railing, support climbers structural components.

# FAQs

## 1. What materials are used to manufacture the products?

We choose materials that are safe, durable and of a reputed make from reputed and reliable suppliers. We also take raw material quality test certificate from our suppliers. All our products pass through a formal quality control department to ensure consistent quality levels. Our play system consists of three base materials M.S - IS standard FRP- fibreglass reinforced plastics made up of top quality polyester resin and virgin quality standard glass.

## 2. How safe are your products?

We have always considered 'safety' in our products as the single most important factor. To make sure that the product we provide adheres to the highest safety levels, we take it into consideration right from the stage where our product is conceived.

### **3. What is general delivery time and mode?**

The delivery time would vary from product to product. Generally all orders are ready for dispatch within twenty one working days from receipt of advance. The mode of transport is selected depending on our client's location and advice.

### **4. What is the average life of your product ?**

We ensure our product durability by using best quality materials and superior manufacturing. With proper maintenance our play system can be used for as long as six to ten years.

### **5. Can your products be customized?**

We offer a perfect blend of technical expertise, precision in manufacturing and high levels of innovation. We have a dedicated design team that develops innovation designs using 3d programs. owing to this most of our multi play system can be customizes for according to your preferences, requirements and constraints. Do write to us, our play consultants would be happy to assist you in designing your dream play structure.
